**We are a group of business consulting companies** with a people oriented group structure: five partners with diverse specialist backgrounds and a dedicated team of some 40 highly experienced associates. You are assured of direct access to at least one of the partners at all times.

**Our consulting philosophy** is focused on the thorough and all-inclusive handling of our clients' interests. We will provide you with a qualified and experienced consultant for your special problem.

**We are "hands-on" consultants**, providing concrete and practical solutions.

**We work meticulously**, but do not waste any time.

**We are active partners** with our clients. Not only do we react to your immediate requirements, but we also identify potential problems and develop appropriate solutions.

**We use a long-term approach** based on continuity. Poorly thought out "snapdecisions" and "crash solutions" are not our style.

**Reliability and mutual trust** characterize our relationship with our clients.

**We are loyal** – and at all times stand ready to help if you encounter problems.

**Our clients** include companies from

- the trade sector
- the services sector
- the industrial sector
- the skilled trade sector.

One focus of our work is on family businesses whose owners as a rule also act as managers of their companies.

Many of our German clients are also engaged in business outside Germany, many of which have subsidiaries or branches operating abroad.

Conversely, we also provide consulting services for foreign companies operating in Germany, especially for their German subsidiaries or branches.

Consequently, our consulting services are well-suited to the needs of international companies. In many countries we cooperate with local consulting companies.

Wherever you do business
